Frequently Asked Questions

Uploading files

Only PDF and Markdown files are accepted. The maximum size of a single file is twenty megabytes, and larger files are rejected with an explicit error.

Uploading the same file twice returns the identifier of the existing document instead of creating a duplicate.

Searching

Every answer contains a reference to the source file and page. If the documents do not contain an answer, the assistant says so and does not invent one.

Search combines vector similarity with keyword matching, and the best candidates are reordered by a cross-encoder before they reach the language model.
